

Environmental Policy

Abbot Print Ltd

Abbot is a trade printer of business stationery based in Hemel Hempstead

Day to day operations impact the environment in a number of ways. We are committed to managing these; increasing our positive environmental contribution while reducing negative impacts.

We shall:

- **Clearly understand our environmental impacts and where we can influence them**
- **Ensure that our operations comply with all relevant legal requirements and other requirements and endeavour to exceed minimum requirements where possible.**
- **Wherever possible, source papers and boards that carry accreditation to the Forest Stewardship Council (FSC) or the Programme for the Endorsement of Forest Certification (PEFC)**
- **Continue our accreditation with FSC and PEFC through the rigorous maintenance of the standards required**
- **Integrate environmental management into day-to-day operating procedures and communicate effectively with staff to facilitate this**
- **Not knowingly trade with any organisation whose activities continue to be the subject of environmental concern**

We intend reducing environmental impacts by:

- **Cutting energy and water consumption**
- **Implementing effective recycling schemes**
- **Working with suppliers to buy products with low environmental impacts, from those with sound environmental policies.**
- **Promoting the FSC and PEFC accreditation scheme amongst our customers**
